

## Scottish Hydrocarbons Teaching Collection

Discussions with the user community over the transfer of the UKCS hydrocarbon cores from the Gilmerton core store to the new facility at Keyworth have highlighted the particular problems of the Scottish Universities who are using Gilmerton for undergraduate and MSc courses. The BGS is addressing these with the establishment of the Scottish Hydrocarbons Teaching Collection, to be located at Murchison House, Edinburgh.

Consultations with the universities currently using the Gilmerton core store have established the following preferred list of wells for teaching:

Wells used for teaching by Scottish Universities		
14/02-1	21/01-6	47/03b-6A
14/19- 5	21/01-7ST	49/12a-5
14/19-18	21/19-1A	49/21-R1
15/17-6	22/06a-9	49/26-2
15/20a-5	29/05b-6, 6Z	98/06-7
15/22-11	30/16-3	98/06-8
16/07a-8	30/16-6	110/08a-5
16/07a-B11	30/16-T1	211/18-A31
16/08b-A2	44/22-1	211/19-4
16/29a-2X	44/23-9	211/27-10

The BGS seeks suggestions of additional teaching wells. Discussions are in hand with the appropriate operators to identify whether they hold additional core slices from these wells that they would be prepared to donate.

Cores from these wells will be held back at Gilmerton until replacement material is obtained, or until the end of the core and sample transfer. The Gilmerton core store continues to welcome visits from university groups until the core transfer is complete, when the Murchison House facility will open.

5 November 2010

### Enquiries about the collection of offshore core and other samples
